About IISRP

The IISRP is an international industry association dedicated to supporting the mission of the synthetic rubber producers. Established in 1960, IISRP unites stakeholders across the synthetic rubber supply chain, fostering global innovation and collaborative growth.

OUR VISION Driving positive change

The IISRP's goal is to be the best value trade association in the world and the **best investment** a synthetic rubber manufacturer can make. It aims to provide even greater value to today's and tomorrow's members of IISRP. The team of IISRP staff, directed and supported by the enthusiastic directors of this dynamic industry, is dedicated to this goal.

OUR MISSION The difference we make

Promote the responsible and sustainable manufacturing of Synthetic Rubber to support the long-term growth of the industry and the global environment in which it operates, benefiting producers, customers, and end users.

KEY FOCUS AREAS

Building on a legacy of success, IISRP advances its mission and vision through three strategic priorities that guide the organization toward lasting industry impact and future-focused progress:

- **Empowering collaboration** that enable organizations to address regulatory challenges, technological disruption, and global supply chain complexity.
- **Fostering innovative initiatives** to unlock our industry to drive sustainable transformation, streamline performance, and thrive in evolving markets.
- **Driving sustainability** by delivering tool and resources needed to minimize environmental footprint, foster a resilient economy, and advance responsible practices across the industry.

The Value of Membership

The IISRP empowers organizations by connecting them with leading companies across the industry value chain. Membership unlocks access to high-impact resources that drive results: networking events, publications, and educational programs. Through active involvement in committees, task forces, and working groups, members have the opportunity to shape the future of the industry.

LEADERSHIP

Networking & Educational

ANNUAL GENERAL MEETING

The foremost international platform for the synthetic rubber industry—driving collaboration, strategic networking, and insight into future innovations.

BUSINESS PROGRAM

In-person sessions at our annual general meeting dive into emerging technologies, evolving research, regulatory developments, market outlooks, feedstock trends, and business-critical topics—with tracks designed specifically for end-use markets.

WEBINARS PROGRAM

Through an efficient and accessible digital platform, our webinar sessions deliver essential insights into the technical and business dimensions of industry-driving professional growth and informed decision-making.

SPONSORSHIP OPPORTUNITIES

Companies leverage annual industry gatherings as sponsors to elevate brand visibility and demonstrate their ongoing commitment to industry advancement.

LIBRARY

Collection of recent and past seminars, presentations, and annual business sessions—from technical to business-focused talks—all designed to keep members in the know.

Technical Leadership

EPIDEMIOLOGY RESEARCH

IISRP's epidemiological research informs regulatory frameworks, worker safety protocols, and toxicological assessments. It also contributes to risk modeling and supports scientific consensus on exposure thresholds and health outcomes.

SYNTHETIC RUBBER MANUAL

An extensive reference offering over 2,000 polymer and elastomer listings, each accompanied by precise technical specifications and brand-specific quality criteria. The database also features 50+ classification tables that systematically organize materials by polymer type, application, and manufacturing method. Accessible via both online-platform and mobile application.

BUTADIENE POPCORN POLYMER - RESOURCE BOOK

Butadiene popcorn polymer presents a notable process safety hazard during its manufacture, transport, and use. This manual offers a streamlined overview of key information to support safer handling practices for butadiene. It draws on academic research, government-supported studies, industry experience, and literature reviews. A PDF version is available for easy download.

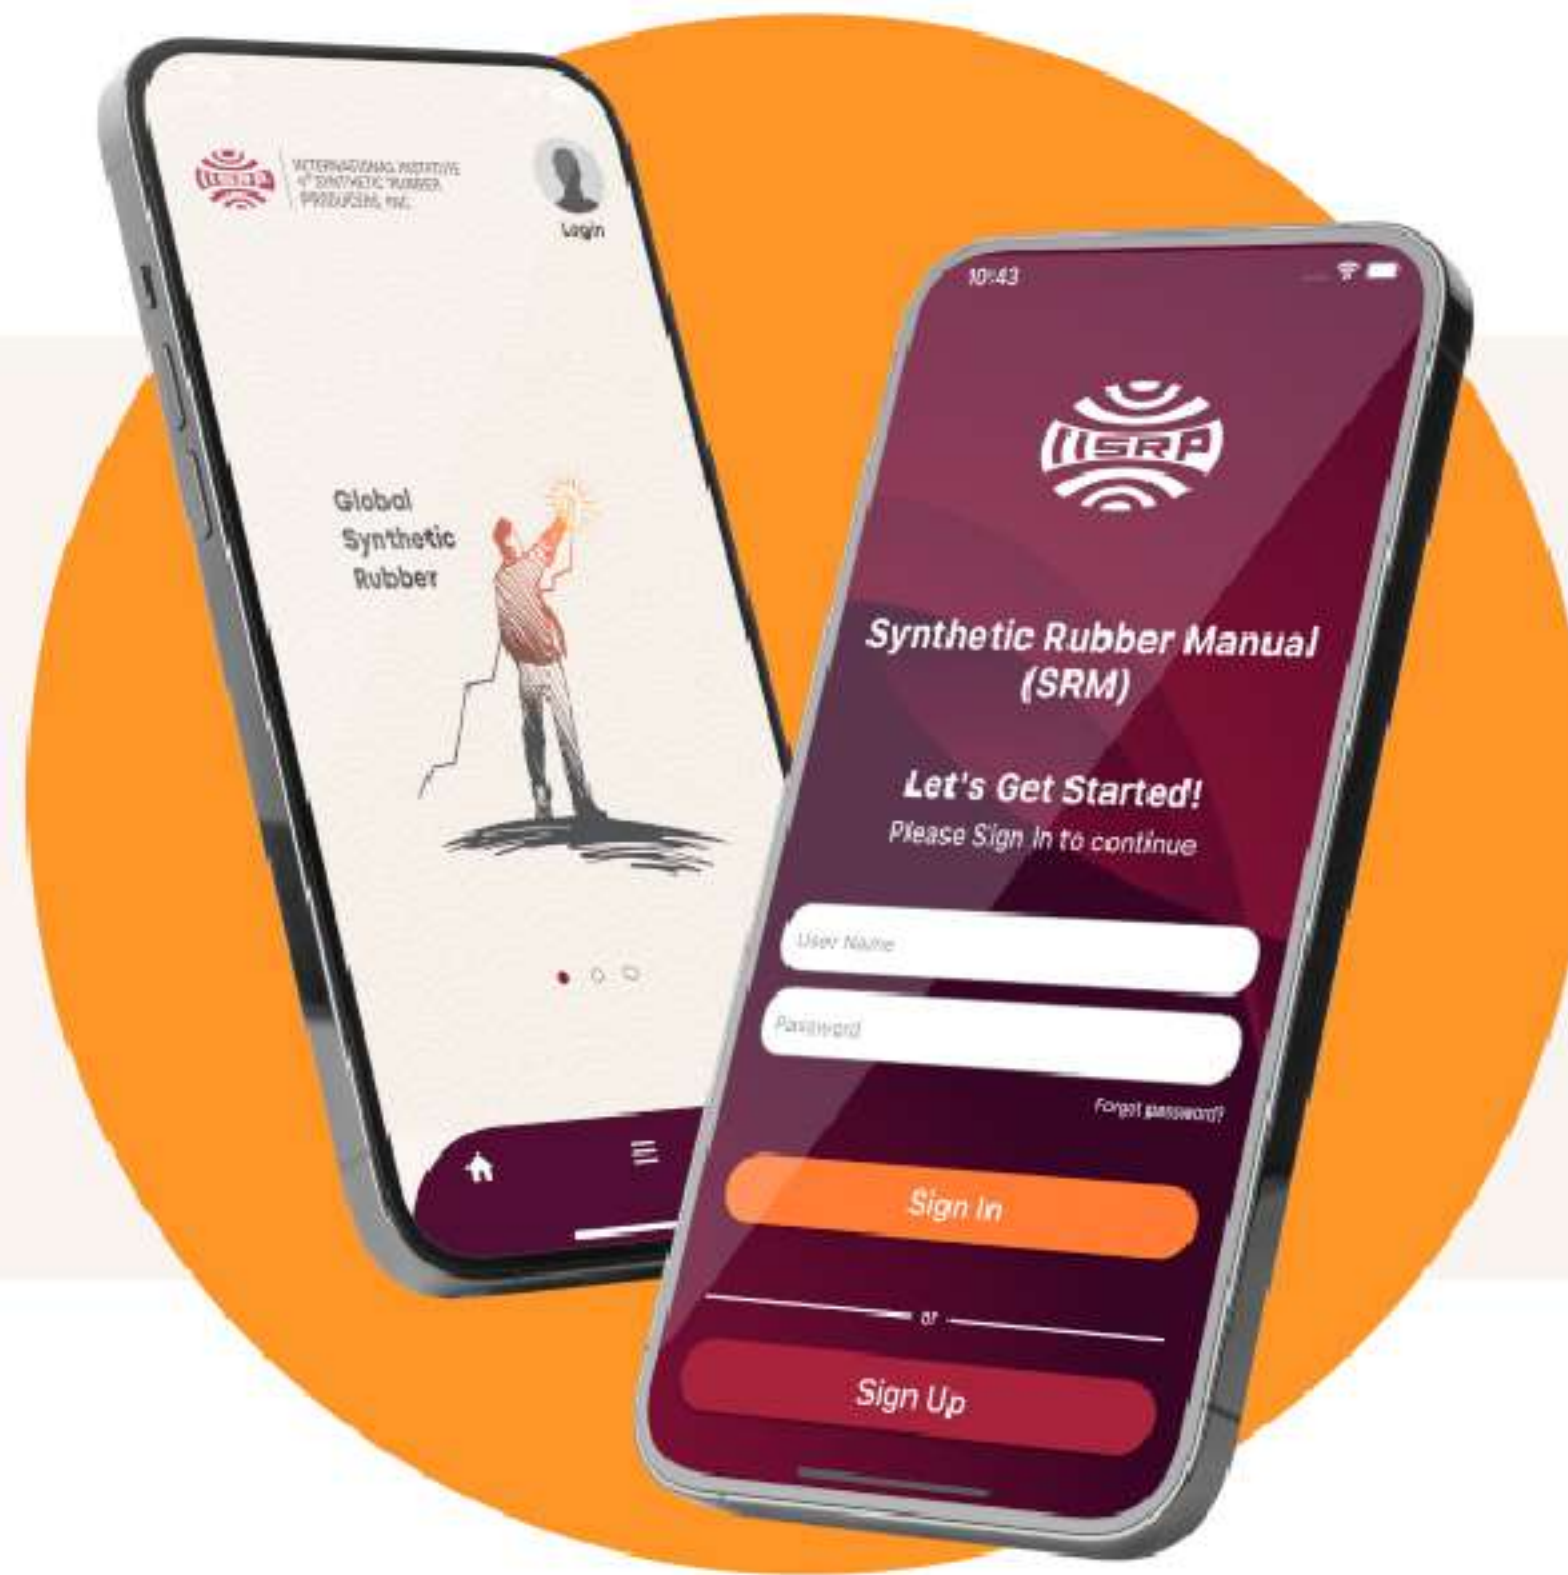

STRATEGIC PARTNERSHIPS

IISRP maintains liaison roles with ISO technical committees. These partnerships help shape international standards and ensure industry alignment with evolving regulatory and environmental frameworks.

Advocacy

RESEARCH & TECHNICAL ADVANCEMENT

- Funds and disseminates **scientific research** on synthetic rubber, including safety and environmental impact studies.
- Supports academic partnerships with institutions like the University of Alabama and University of Oklahoma.

GLOBAL REGULATORY MONITORING REPORT (QUARTERLY BASIS)

Monitor and inform about upcoming regulatory changes in key regions, with focus on regulation driven by sustainability considerations. Provide recommendations to members on how to engage with their supply chains and how to build competitive advantage considering the evolving regulation.

INDUSTRY REPRESENTATION AND STANDARDS

Collaborates with organizations like **ISO** to shape international standards for rubber products and environmental practices.

REGULATORY ENGAGEMENT

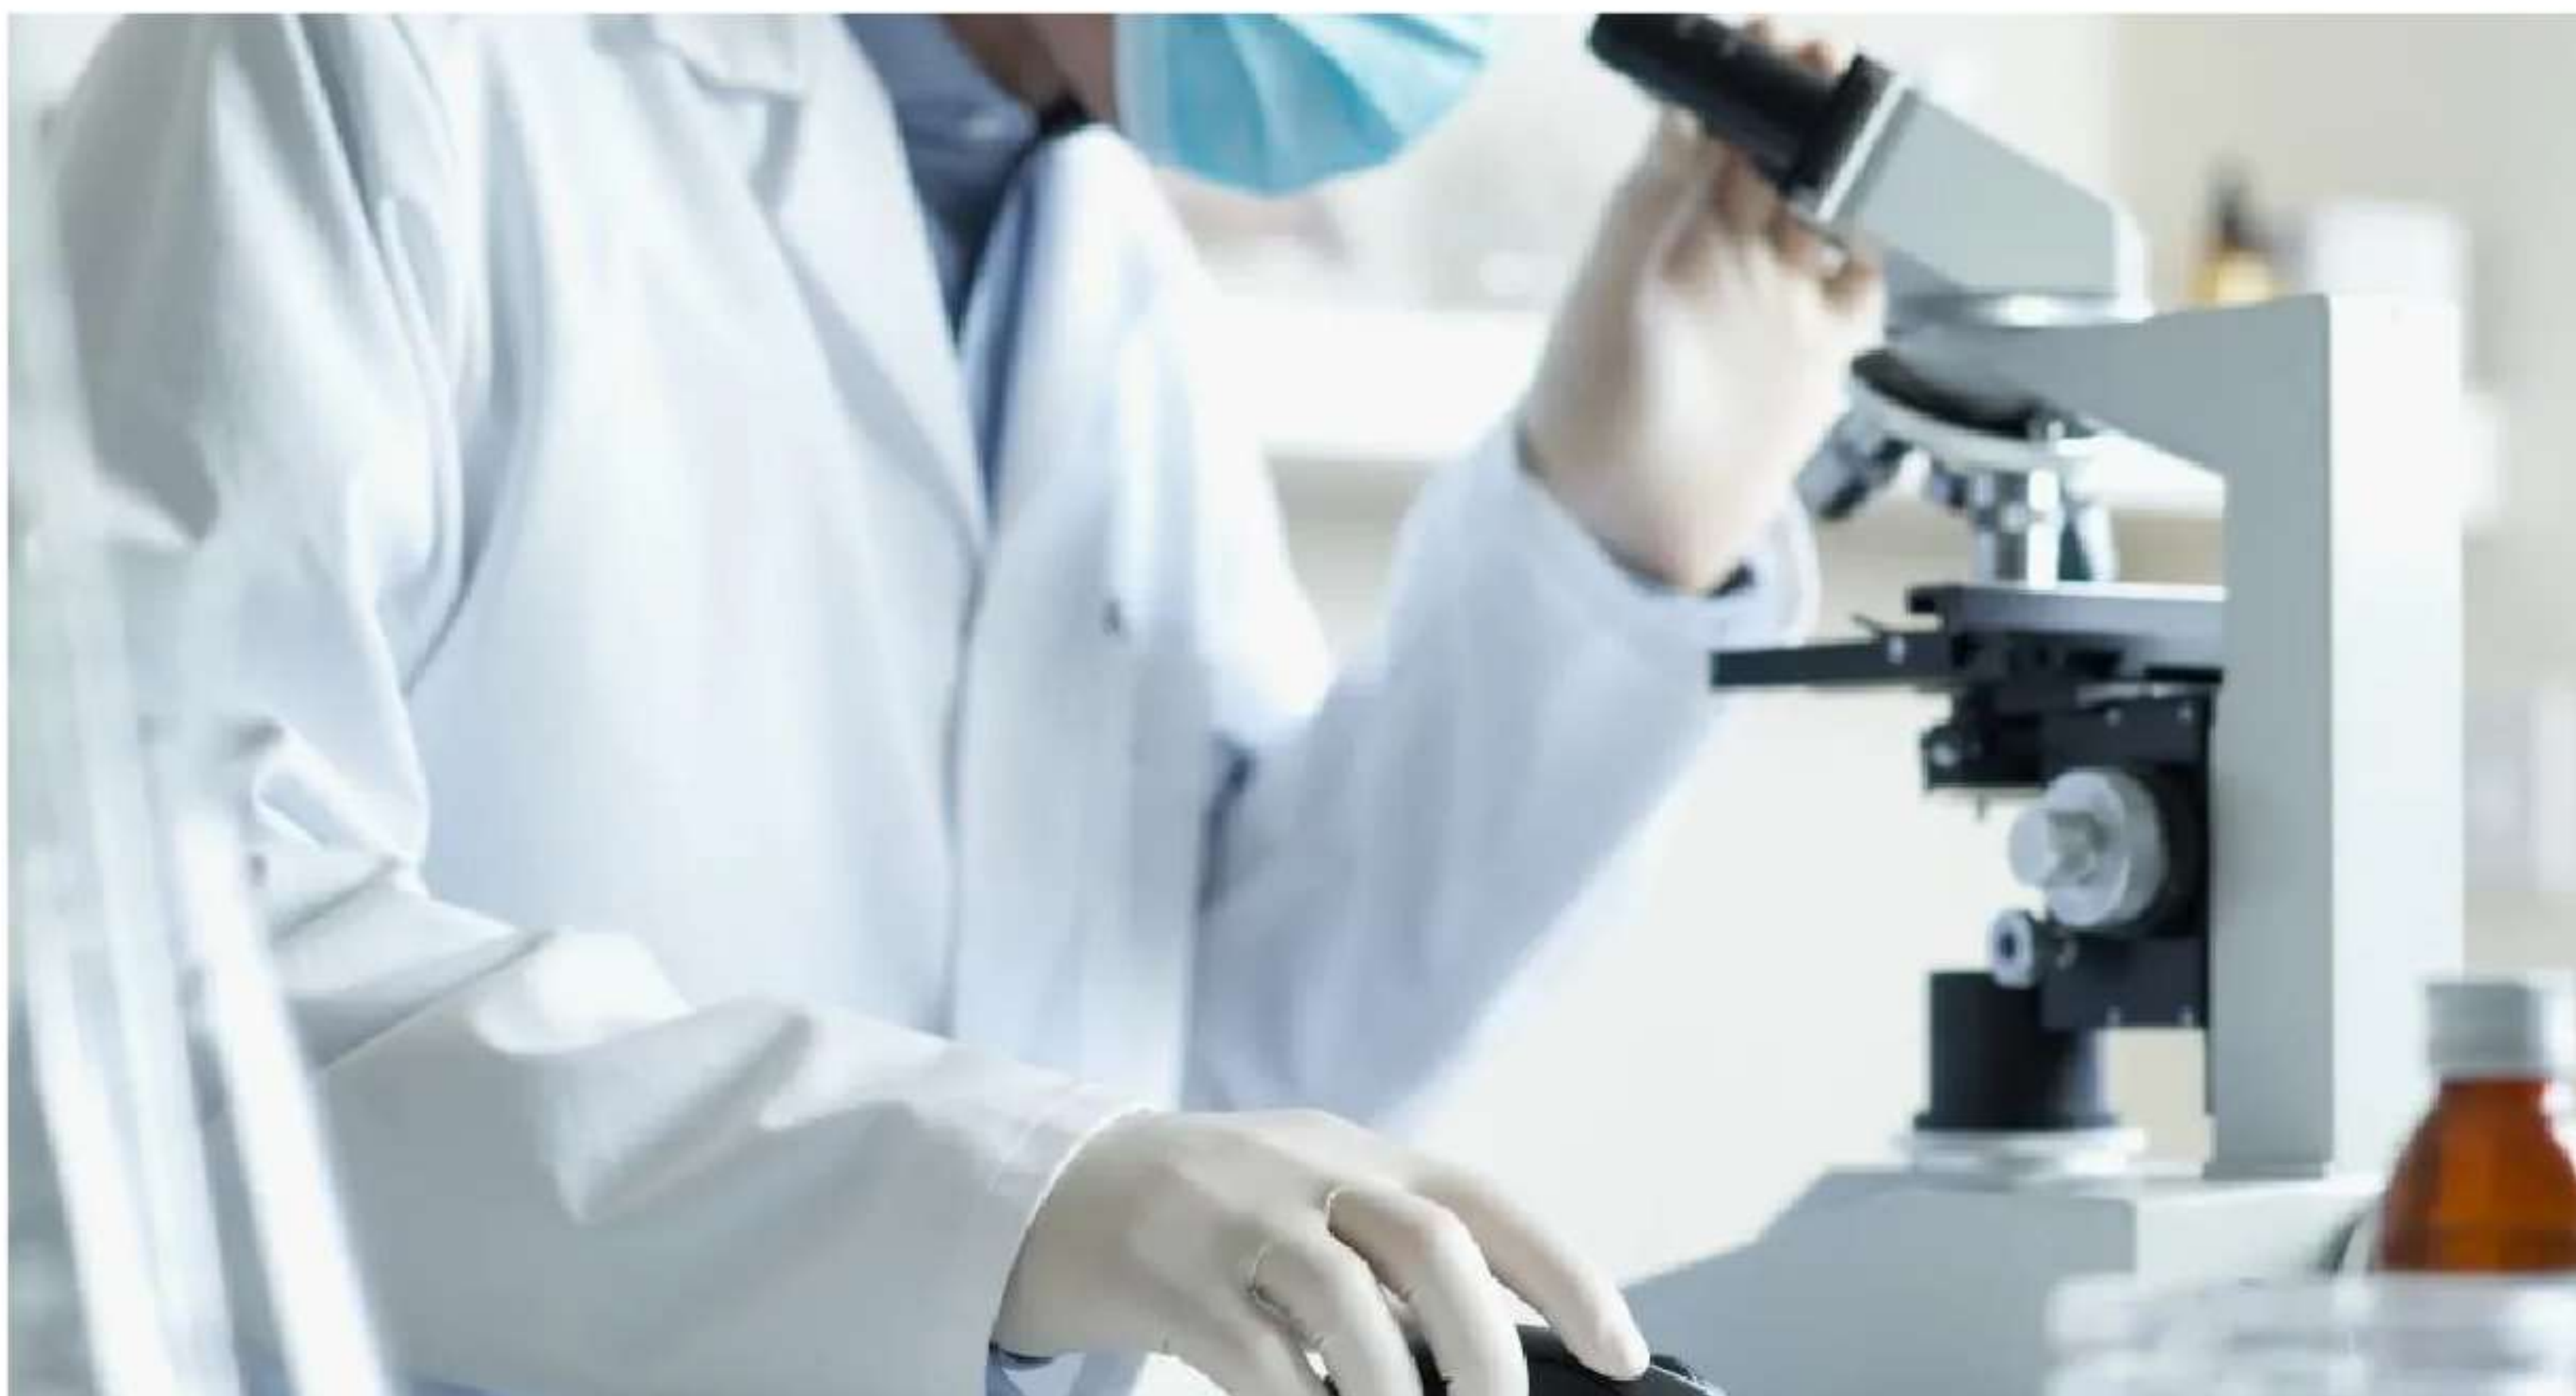

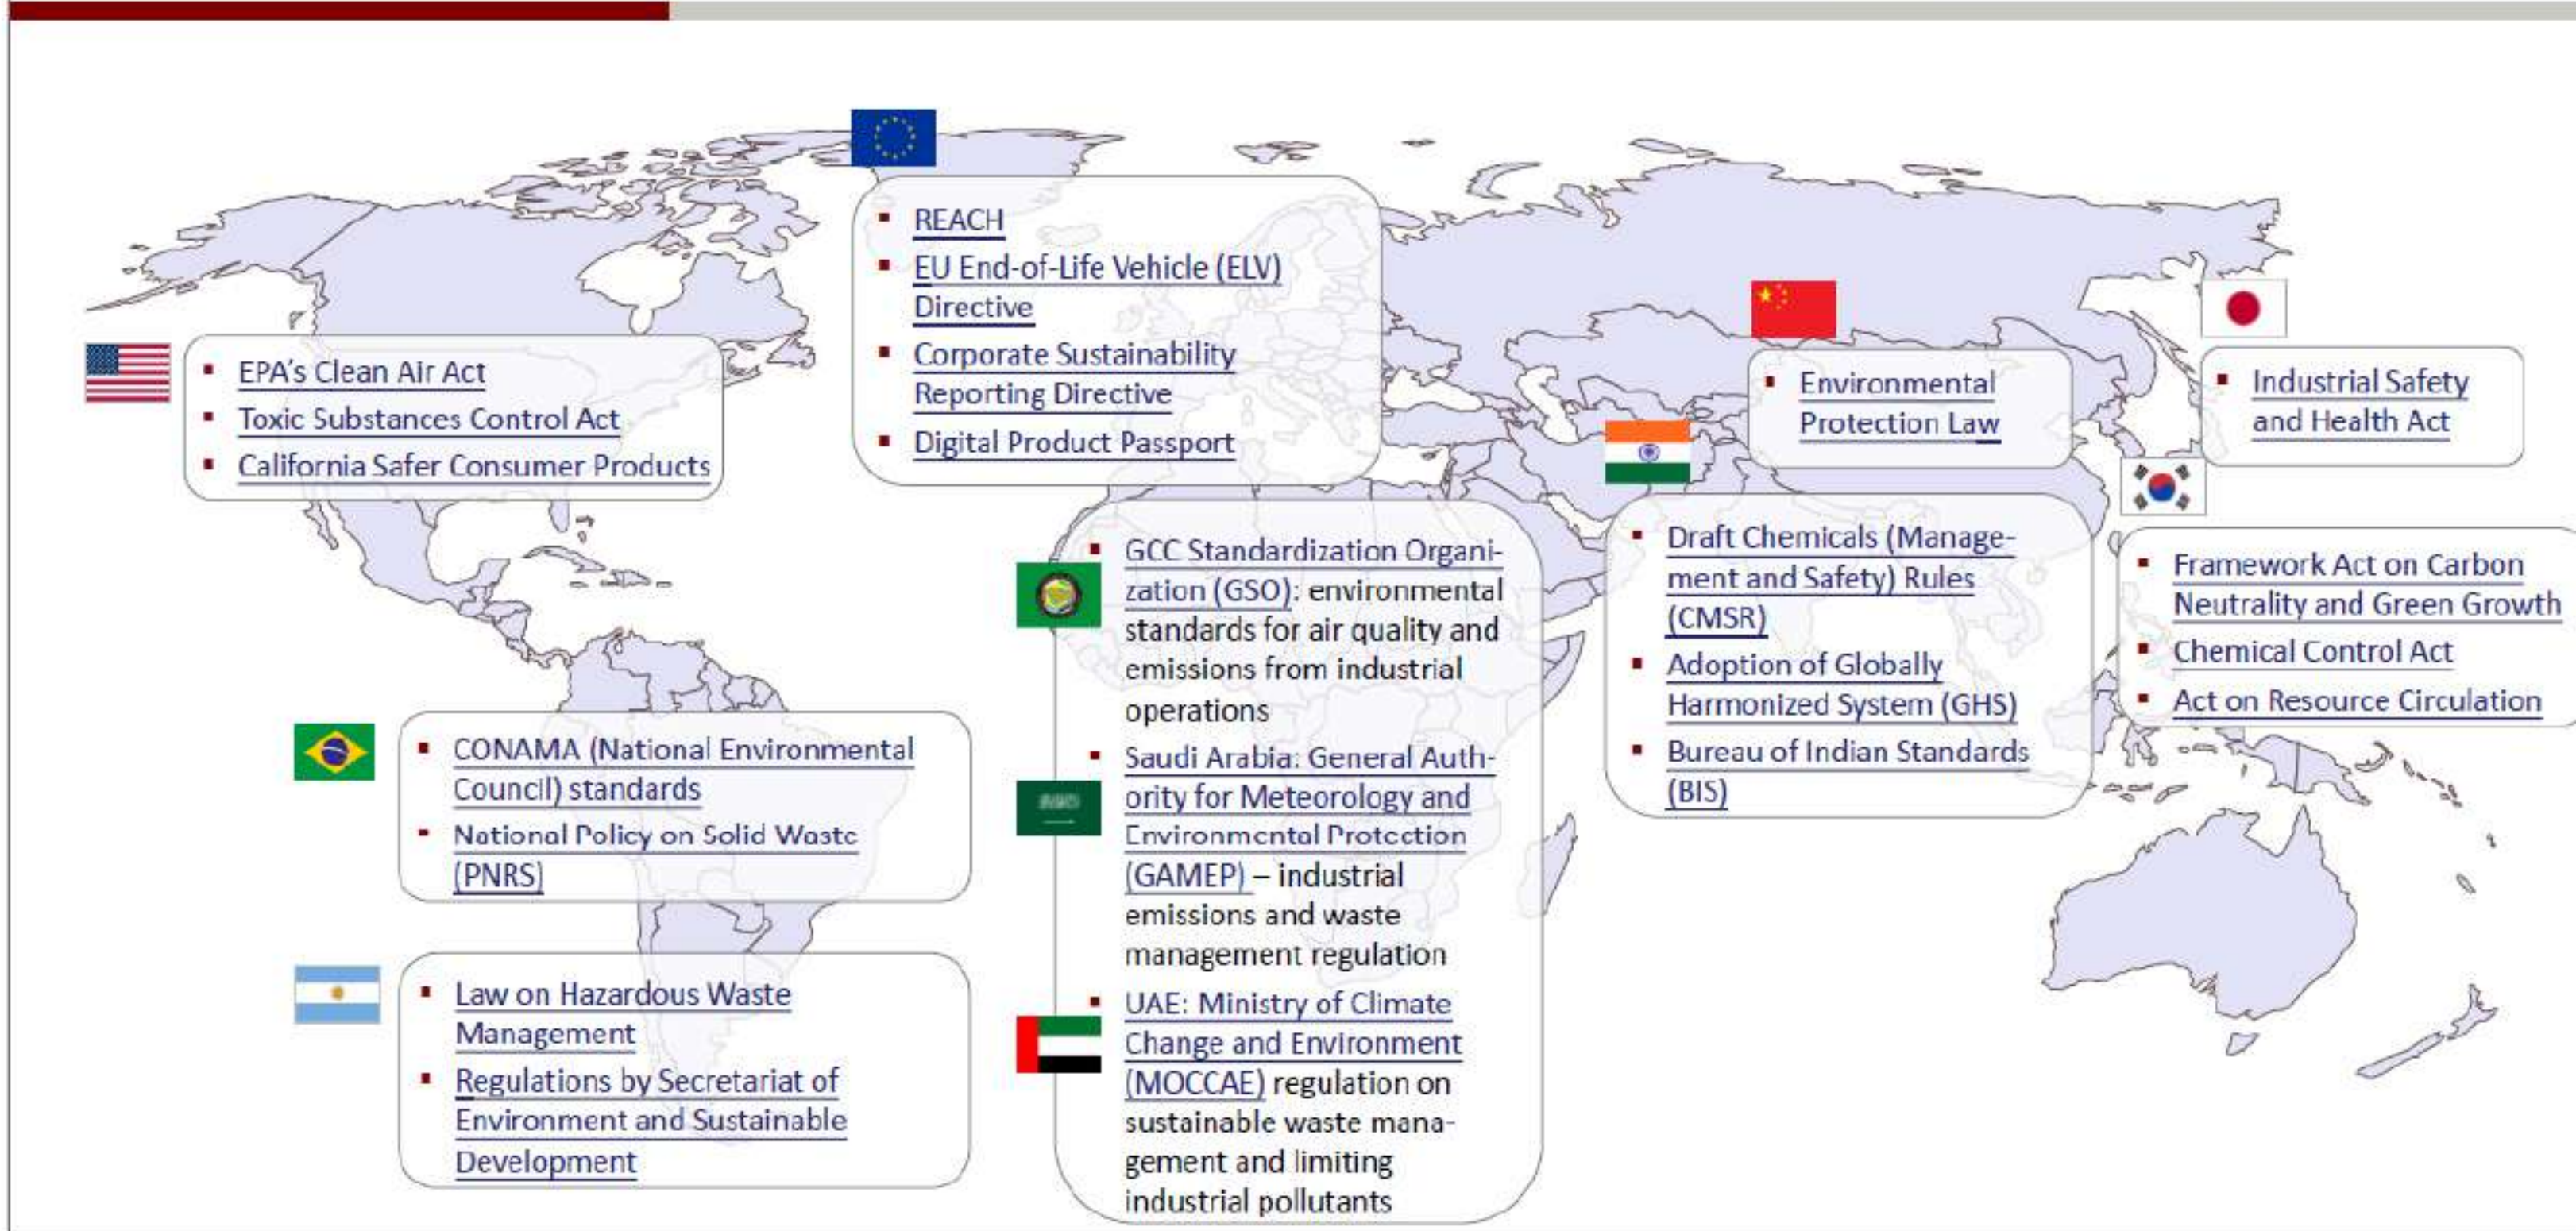

Engages in regulatory activity by providing technical expertise, data-driven resources, and strategic collaboration to support safe and sustainable practices across the synthetic rubber industry.

PRODUCERS, INC.

Overview: Key regulation worldwide impacting synthetic rubber producers

Statistical & Market Intelligence

WORLDWIDE RUBBER STATISTICS

Considered the leading source for authoritative data on synthetic rubber production capacity, Includes analysis by elastomer type, geographic distribution, and corporate ownership. Features updates on planned and announced expansions of synthetic rubber plants. Accessible via both online-platform and mobile application.

SYNTHETIC RUBBER CONSUMPTION FORECAST

A predictive analysis projecting synthetic rubber demand over a five-year period. It supports strategic decision-making for manufacturers, investors, and policymakers by providing: Regional insights, elastomer segmentation, economic drivers and scenario modeling (including baselines, optimistic, and risk-adjusted projections).

QUARTERLY REPORT

A key resource for IISRP members, this report offers year-end estimates based on recent market data. It outlines global and regional synthetic rubber trade dynamics, including inventories, production, and shipments, and provides an executive overview of current market conditions.

STRATEGIC PARTNERSHIPS IN ASIA

Our offices in China and Tokyo enhances intelligence on regional market dynamics.

CAPACITY

Capacity by Producer

(All Capacities in Thousand of Metric Tons, KT)

Producer	Plant
CHIMEI	Tainan
Denka Co., Ltd.	Omi
En Chuan Chemical Industries Co., Ltd.	Taichung
ENEOS Materials Corporation	Chiba
ENEOS Materials Corporation	Kashima

Sustainability & Innovation Leadership

SUSTAINABILITY SURVEY

Insights designed to guide organizations in assessing their sustainability efforts through a structured comparison with standards fostering continuous improvement, meaningful goal setting, and impactful sustainability strategies.

CIRCULAR ECONOMY REPORT

A diagnostic framework measures how effectively circular strategies—such as waste minimization, material recirculation, and natural system restoration—are embedded within the synthetic rubber industry.

GLOBAL FORUMS & TECHNICAL EXCHANGE

Hosts the Annual General Meeting (AGM) featuring sessions on bio-based innovations, advanced technologies, and regulatory trends.

AWARDS PROGRAM

IISRP supports innovation through its prestigious awards program, which recognizes outstanding contributions to global industry development, innovation, and sustainability.
