**HOUSTON, Texas, USA - 22 October 2018**—The International Institute of Synthetic Rubber Producers (IISRP) has published the 2018 edition of *Worldwide Rubber Statistics*, the world's leading source for authoritative data about synthetic rubber.

This edition of the book, which has been published annually for more than 30 years, has revisions to elastomer plant capacities as the synthetic rubber market continues to be dynamic. Additionally, IISRP's China office has played a key part in this publication to enhance the intelligence on the Chinese market.

The 85 pages, 8 1/2"x11" book provides a comprehensive analysis of capacity by elastomer type, by geographical distribution, and by corporate ownership. It also features a graphics section that emphasizes statistics in easy-to-read format and a section on capacities of synthetic rubber production facilities throughout the world, including a section on planned and announced expansions of synthetic rubber plants.

The book will be available for order on the IISRP website at [www.iisrp.com/publications](http://www.iisrp.com/publications)

The IISRP is an international not-for-profit trade association with over 60 corporate members, domiciled in 22 countries, who produce 75 percent of the world's supply of synthetic rubber. Incorporated in 1960 and headquartered in Houston, Texas, the Institute supports section offices in Milan, Tokyo and Beijing.
